Abstract—This document is a template for L^AT_EX. This and the IEEEtran.cls file define the components of your paper [title, text, heads, etc.]. ***CRITICAL: Do Not Use Symbols, Special Characters, Footnotes, or Math in Paper Title or Abstract.**

Index Terms—max, five, important, keywords.

I. INTRODUCTION

The IEEEtran class file is used to format your paper and style the text. All margins, column widths, line spaces, and text fonts are prescribed; please do not alter them. You may note peculiarities. For example, the head margin measures proportionately more than is customary. This measurement and others are deliberate, using specifications that anticipate your paper as one part of the entire proceedings, and not as an independent document. Please do not revise any of the current designations.

Text heads organize the topics on a relational, hierarchical basis. For example, the paper title is the primary text head because all subsequent material relates and elaborates on this one topic. If there are two or more sub-topics, the next level head `\section{Name}` (uppercase Roman numerals) should be used and, conversely, if there are not at least two sub-topics, then no subheads should be introduced, only use `\subsection{Name}`.

ACKNOWLEDGMENT

This report corresponds to Lab 04 in the course *Elektroniske enheter og kretser*. All related materials (L^AT_EX sources, figures, and code) are released under the MIT License and available at https://github.com/Kjelseth/EEK_lab.
